

Development Parcels in the City of Austell, Georgia, USA

The various maps produced portray the City of Austell with proposed development parcels. The primary map consists of roadways, parcels, and bodies of water with the three insert maps A, B, and C, showing a close up of the development parcels. The suggested development zones are considered to come at an ideal time given the City's close proximity to Atlanta, Georgia.

Site Hectares: A = 14.34, B = 13.73, C = 7.78

Rectifying Street Digitization Errors in the City of Austell, Georgia, USA

A section of the initial Street Edges layer in the City of Austell, Georgia, specifically Sweetwater Lane, Cambrian Ter, and Bishop Row, had been originally poorly digitized with there being overlaps with the Parcels layer. After manually correcting the vertices of the Street Edges layer, it best reflects the real world data. The changes can be seen with a pre and post correction map.
